

SPUR - Regenerative Design 091311 6 pm

**EVENT:** Sustainability remains at the forefront of innovation in the design professions as our urban challenges persist. LEED and other metrics have brought the conversation to the mainstream, and yet there is doubt that such measures can make a big enough difference to solve the problems at hand. **Sandy Mendler, Robert L. Thayer** and **Sim Van der Ryn** will explore the future of sustainable design, with a focus on regenerative design solutions. *Co-presented with UC Berkeley Extension's Sustainable Design Program.*

*This event is free and open to the public.*

## **Regenerative design**

**Tuesday, September 13, 2011**

**6:00 pm**
