

Sustainable new build: *Hammarby Sjöstad is Stockholm’s largest urban construction project. The “Hammarby model” has become a tool for environmentally friendly city development around the world. When completed in 2017, 26,000 people will be living here in 11,500 apartments. The district has been planned using an eco-cycle approach and is intended to showcase ecological and environmentally sensitive construction and living.*
From: *Cities Alive - Rethinking Green Infrastructure*, Foresight, Arup, 2015.
